

TRIPLE S

Terra-Renew™

Blended-Recycled LLDPE Can Liners

The EarthCare® seal indicates that Terra-Renew™ liners meet or exceed EPA guidelines for Post-Consumer Waste Content. They're made from a combination of Post Consumer and Post Industrial materials.

And here's more good news: You don't have to sacrifice performance to make an environmentally sound choice. These liners deliver strength and thickness equal to your toughest applications. Even the carton environmentally friendlier. The ink used on the cartons is water based and the cartons are manufactured from 60% recycled content.

APPLICATIONS: Terra-Renew™ liners are made from recycled materials, so they're an environmentally better choice. Perfect for cost-conscious users looking for a thick bag suited to heavy-duty applications like sharp, heavy or irregular waste.

FEATURES

- Made with high-quality blended resins...meets or exceeds EPA Guidelines for Post-Consumer Waste Content.
- Super tough – great puncture and tear resistance.
- Seamless tubular construction.
- Leak-proof star seal.
- Designed for extra heavy-duty use – available in 1.00 to 2.00 MIL.
- Wide range of sizes.
- Available in Black.
- Coreless rolls for ease of use and storage.

Bag Product Specifications – Terra-Renew™

The Triple S difference.

Terra-Renew™ liners are part of a commitment to quality you can depend on.

The first time you try one of our liners you'll discover that the difference is real. We follow an exacting formula for manufacturing and use only the highest grade resins and recycled materials to manufacture the best liners. Gauge-for-gauge, our liners are stronger than others, and provide consistent and reliable containment for a wide range of applications.

You are what you make.

From lightweight liners used in offices, to super-strong trash bags intended for the most demanding industrial waste, our bags are built to perform. Our linear tube construction process takes place in a precisely climate-controlled environment. This allows us to maintain the exact manufacturing conditions needed to produce varying sizes and types of bags with no flaws or irregularities in the material.

We select our resins using an extremely narrow range of parameters, always adhering to our own high standards for consistency.

Our automated lines are monitored using sophisticated sensors that alert us immediately to potential problems and ensure total consistency in manufacturing. Using only high-quality blended resins allows us to make a stronger, more dependable trash bag.

- **Seamless tubular construction maximizes overall integrity.**
- **Star-seal bottom eliminates seam failure and prevents leaks.**
- **Continuous quality testing ensures optimum performance and reliability.**

**Meets or exceeds
EPA Guidelines
for Post-Consumer
Waste Content.**
