

High Density HMW-HDPE Can Liners

High-Performance HD

Gauge for gauge, Galaxy liners handle heavier loads at a lower cost versus competitive bags made from less-advanced films. These liners also promote environmental source reduction—thinner, stronger films mean less waste going into incinerators or landfills.

The result: you get better performance at a lower cost and promote source reduction.

APPLICATIONS:

Galaxy liners bring outstanding performance and environmental source reduction to a wide range of waste-containment needs, including foodservice, as well as, other commercial and institutional applications. These liners easily handle non-sharp, heavy, wet waste, provide highly effective odor containment and are an environmentally sound choice.

FEATURES

- *Made with USDA and FDA approved HMW-HDPE resins using our exclusive manufacturing process.*
- *Maximum strength and load capacity.*
- *Great chemical resistance, and odor containment.*
- *Wide range of temperature resistance.*
- *Seamless tubular construction.*
- *Leak-proof star seal.*
- *Wide range of sizes.*
- *Available in black and natural.*
- *Coreless rolls for easy use and storage.*

The Triple S difference.

The first time you try a Triple S can liner you'll discover that the difference is real. We follow an exacting formula for manufacturing and use only the highest grade resins to manufacture the best liner films. Our films are thinner and stronger, and have consistently set the standard in the industry. Gauge-for-gauge, our liners are stronger than any others, and provide consistent and reliable containment for a wide range of applications.

You are what you make.

From lightweight liners used in offices, to super-strong trash bags intended for the most demanding industrial waste, Triple S bags are built to perform. Our linear tube construction process takes place in a precisely climate-controlled environment. This allows us to maintain the exact manufacturing conditions needed to produce varying sizes and types of bags with no flaws or irregularities in the material.

We select our resins using an extremely narrow range of parameters, always adhering to our own standards for consistency.

Our automated lines are monitored using sophisticated sensors that alert us immediately to potential problems and ensure total consistency in manufacturing. Using only 100 percent prime virgin resin allows us to make a stronger, more dependable trash bag.

- **Seamless tubular construction maximizes overall integrity.**
- **Star-seal bottom eliminates seam failure and prevents leaks.**
- **Premium resins deliver run-to-run consistency and reliable bag performance.**
- **Continuous quality testing ensures optimum performance and reliability.**
- **Use of less material reduces the solid waste that goes into landfills.**
