Swine Influenza A (H1N1) Update (10/26/09)

According to the Center for Disease Control and Prevention (CDC), human cases of swine influenza A (H1N1) virus infection have been identified in the United States. Human cases of the Swine Flu virus infection have also been identified internationally. The following are some of the CDC tips for limiting your risk of catching the swine flu virus:

- Cover your nose and mouth with a tissue when you cough or sneeze. Throw away the tissue in the trash after you use it.
- Wash your hands often with soap and water, especially after you cough or sneeze. Alcohol-based hand cleaners and Protect-4 hand sanitizer are also effective.
- Avoid touching your eyes, nose, or mouth. Germs spread easily that way.
- If you get sick, stay home from work or school and limit contact with others to keep from infecting others.

Swine Flu Information - Disinfectants

The World Health Organization (WHO) and the U.S. Centers for Disease Control and Prevention (CDC) has issued a notice regarding the recent Swine Influenza Virus A (H1N1) cases that have been reported in Mexico as well as the United States. The potential pandemic effect worldwide has created a concern for precautionary measures for people to take to limit the spread of this virus.

EPA has issued a statement indicating they believe all currently registered products making Influenza A Virus claims will be effective against this H1N1 swine flu strain.

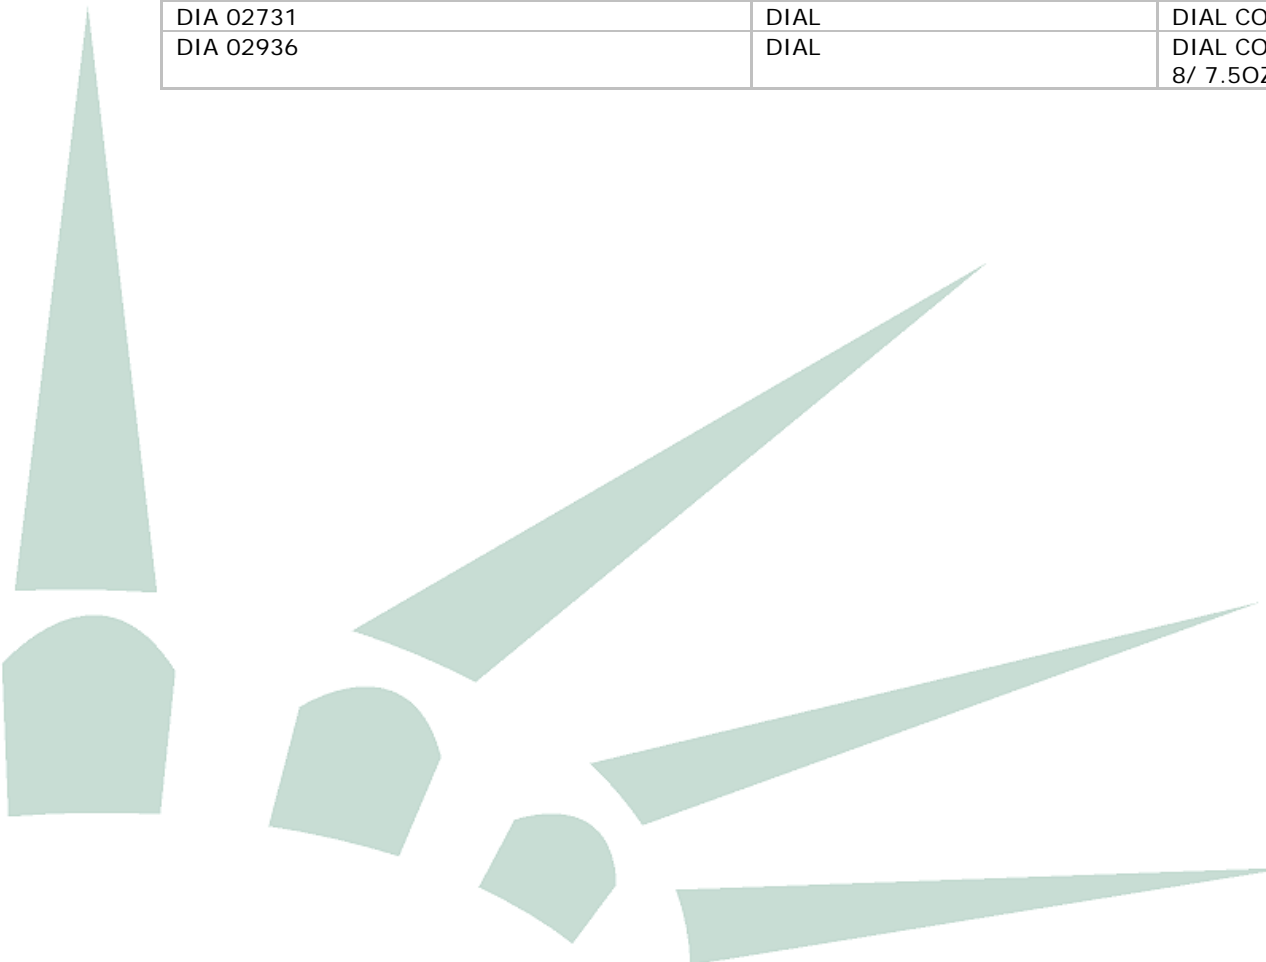

EPA believes, based on available scientific information, that the currently registered Influenza A Virus products will be effective against the 2009-H1N1 flu strain and other Influenza A Virus strains on hard, non-porous surfaces. For safe and effective use of these products, always follow the label instructions, paying special attention to the product's dilution rate (if applicable) and contact time. As the CDC stresses, your first line of defense is to wash your hands frequently with soap and water. These registered disinfectant products are for use on hard, non-porous surfaces, not the skin.

Liberty Janitorial Supply offers a variety of soaps, hand cleaners, and tissues that allow you to follow the CDC's recommendations. We are bringing in additional stock and watching our inventory levels on the following products, yet encourage you to work with your Liberty Janitorial Supply sales representative to meet your product needs.
